

H<sub>2</sub> valleys to accelerate the energy transition

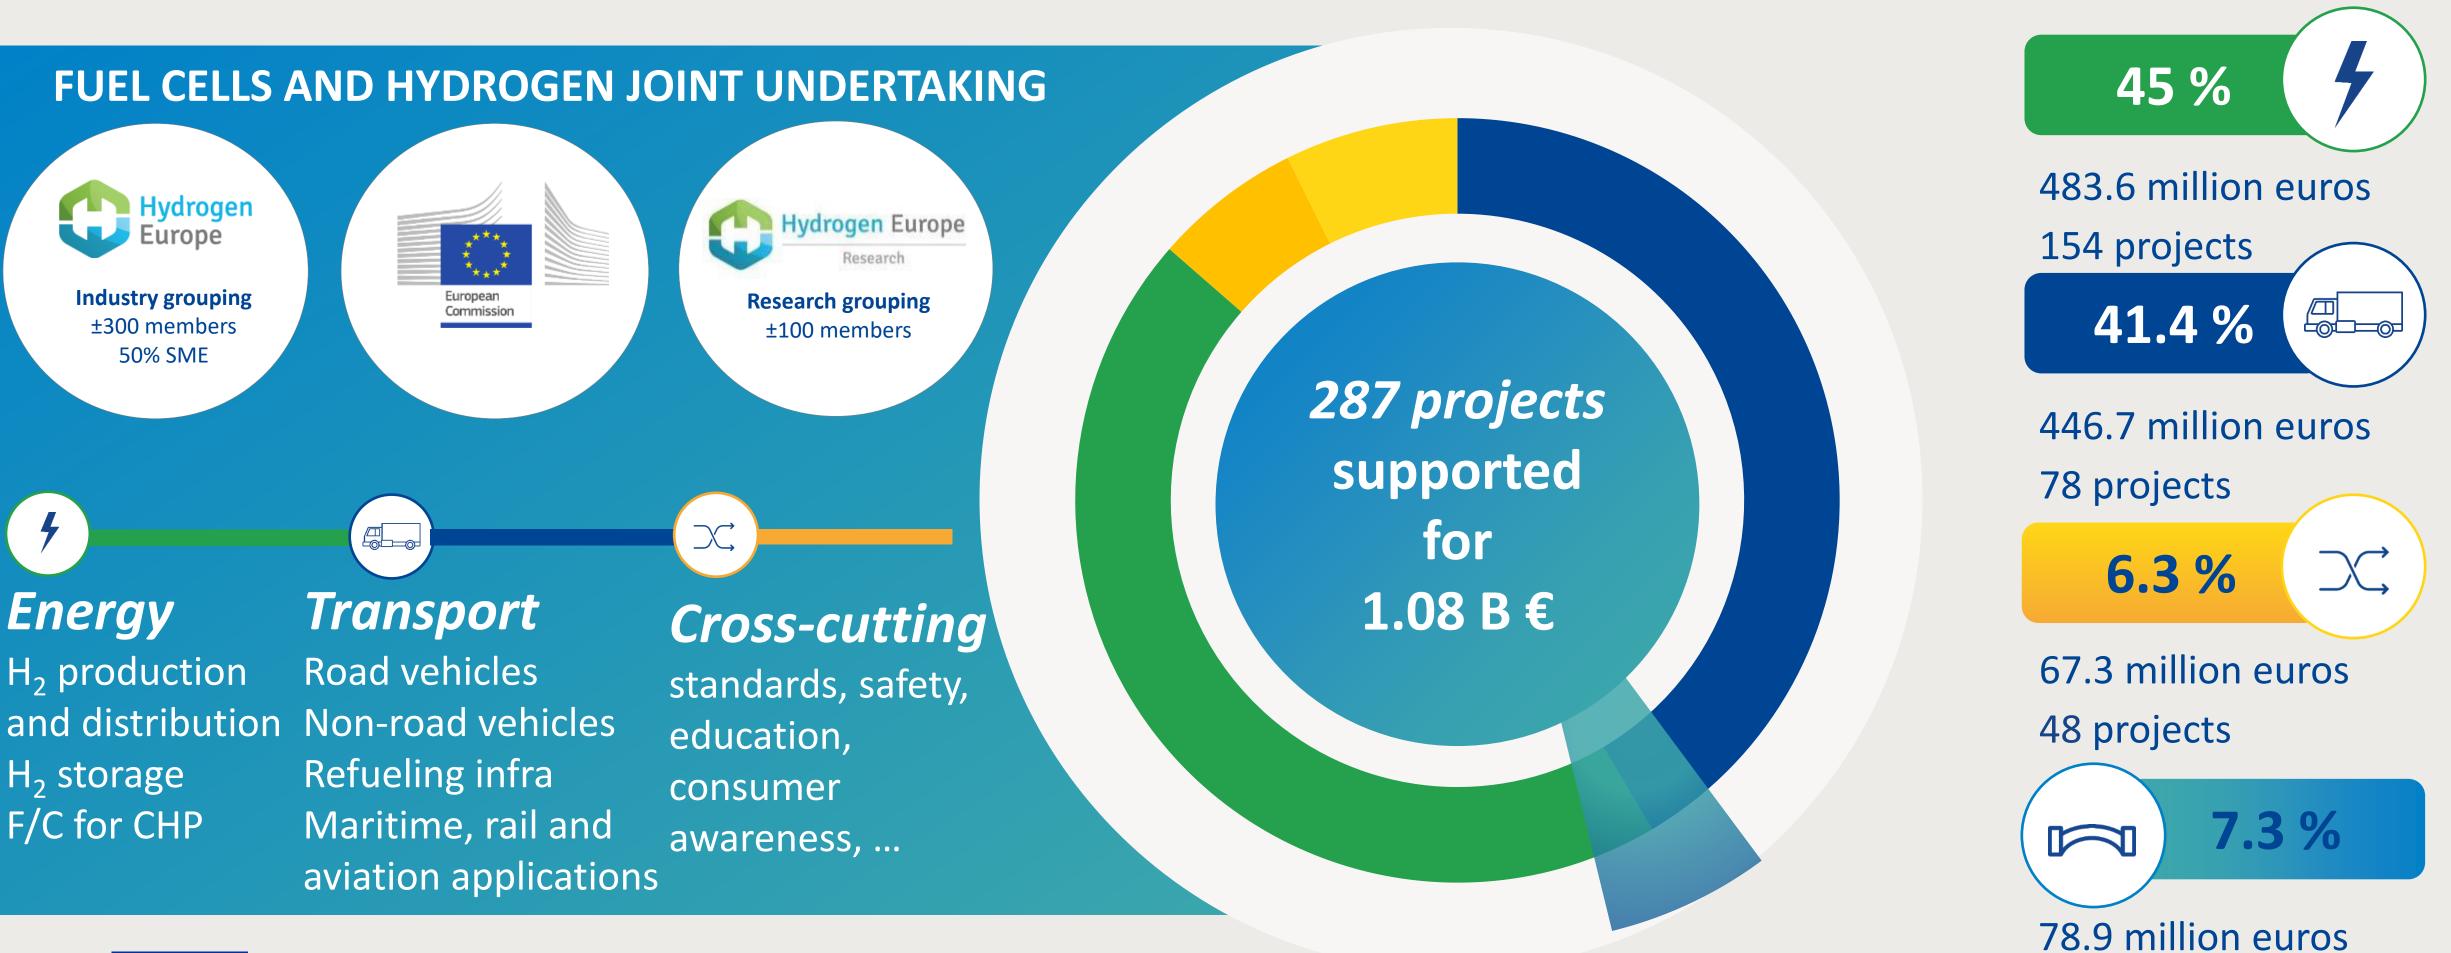

Bart Biebuyck
4<sup>th</sup> Oct. 2021 Dubai

### Strong public-private partnership with a focused objective

A combined private-public of more than 2 billion Euro has been invested to bring products to market readiness

7 projects

### Hydrogen valleys as an accelerator for a European hydrogen economy

Its scope is system integration: Production of renewable H2, storage, distribution and end use (transport, stationary & industry)

#### Orkney's Island (Scotland):

- H2 production by wind on Islands
- Storage and transportation by truck
- Use: heat (school), power (ferries) & mobility (municipality cars)

#### **North Netherlands (Groningen):**

- 31 partners (public + private)
- Electrolysis for green H2 production,
- H2 Mobility: buses, passenger cars and trucks

HYDROGEN VALLEY

- H2 Refueling stations
- E-Kerosene for aviation
- H2 for an inland water transport barge
- Domestic Heat applications
- Underground H2 storage (Hystock)

#### **Hydrogen Island (Spain)**

- H2 production from solar
- H2 injection in gas-grid
- Use: heat (hotel, municipality buildings), power (port of Palma), mobility (buses)

### Hydrogen Valleys have become a global phenomenon

Integrated projects are emerging all around the world and sharing lessons learned to accelerate the energy transition

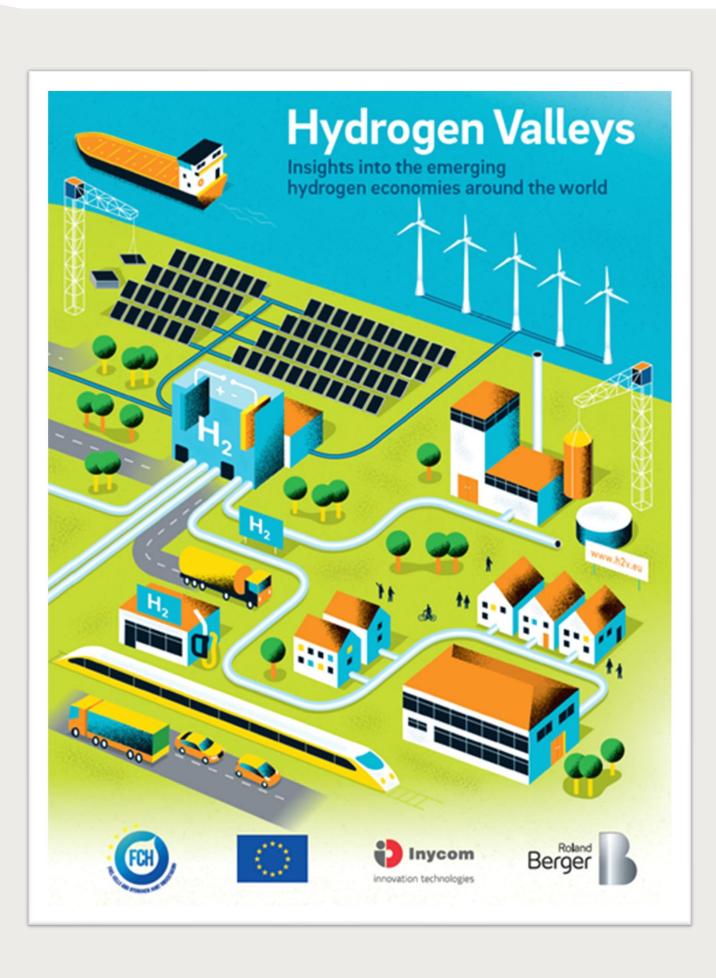

## Hydrogen Valleys continue under MI2.0 Clean Hydrogen Mission

Final report identified key barriers to be tackled under the next Hydrogen Mission

### **MI identified Key Remaining Barriers:**

- Obtaining public funding support to close funding gaps
- Finding green hydrogen off-takers and signing long-term contracts
- Ensuring FCH applications Technology readiness
- Ensuring adequate legal regulatory support (carbon pricing, standardization, fast permitting, etc)

#### Next steps under MI 2.0:

**Further development and enhancement** of the MI Hydrogen Valley Platform. Target for 100 Hydrogen Valleys and minimum three in each member country.

# Hydrogen – Research and Innovation

Partnership under Horizon Europe Programme with hydrogen valleys as an integral part of the program

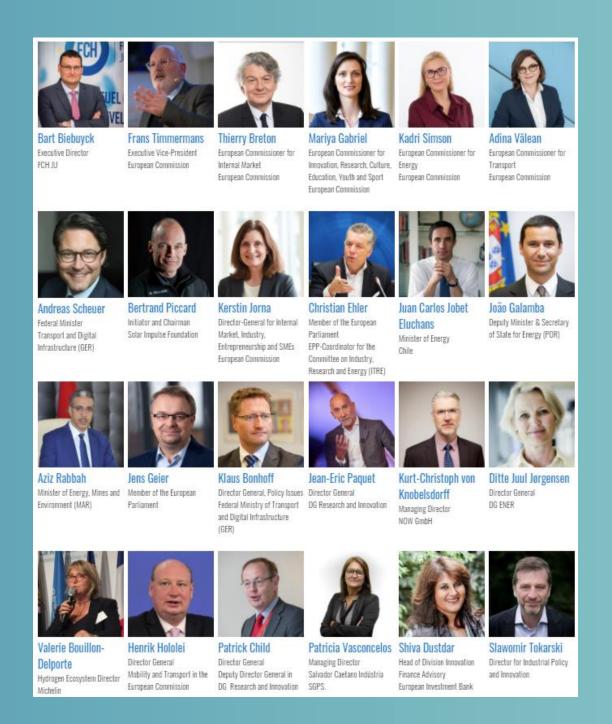

#### Maintain and strengthen EU's global leadership role Clean Hydrogen Partnership with 1 billion EUR budget; start Jan. 2022 PILLAR H2 PRODUCTION PILLAR H2 DISTRIBUTION PILLAR H2 END USES **SO5 Transport vehicles SO3 Storage & delivery of H2 SO1 Low carbon H2 production** 10. Building blocks Large scale storage 1. Electrolysis 11. Trucks & large vans Pipeline transport (grid) 2. Other modes of production SO9 Supply Chain Manufacturing & scale-up 12. Maritime (inc. ports) Liquid carriers 13. Aviation Non-pipeline transport 14. Rail Key technos for distribution 15. Coaches **SO2 Integration of renewables SO6 Heat & Power** . Role of electrolysis in the energy **SO4** Refuelling infrastructure 16. Stationery H2 fuel cells system HRS for multiple applications 17. H2 burners and turbines **SO7 Industry** 18. H2 in industry **SO8 Hydrogen Valleys** Integrated H2 ecosystems combining multiple applications (ports, industrial hubs, cities, etc.)

### The 2<sup>nd</sup> European Hydrogen Week

The biggest European hydrogen conference hosting key policy makers at European, National and regional level.

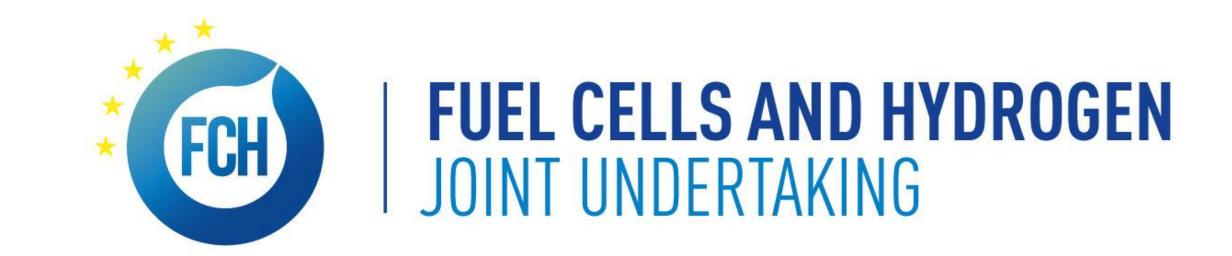

2020: >10.000 people, 63 countries
